

## Ansible Configuration Management

The screenshot shows a web browser window with multiple tabs. The active tab is titled "Production Ar" and shows the Jenkins web interface. The browser's address bar displays the URL: `ec2-52-53-193-255.us-west-1.compute.amazonaws.com:8080/job/Production%20Ansible%20Deployment%20API%20Playbook/1/console`. The Jenkins header includes the logo, a search bar, and the user "admin" with a "log out" link. The breadcrumb trail is "Jenkins > Production Ansible Deployment API Playbook > #1".

On the left sidebar, there are links for "Back to Project", "Status", "Changes", "Console Output" (which is selected), "View as plain text", "Edit Build Information", and "Delete Build".

The main content area is titled "Console Output" and displays the following text:

```
Started by user admin
Building in workspace /var/lib/jenkins/workspace/Production Ansible Deployment API Playbook
[Production Ansible Deployment API Playbook] $ ansible-playbook /home/ec2-user/updateprodapi.yml -f 5
[WARNING]: provided hosts list is empty, only localhost is available

PLAY RECAP *****

Finished: SUCCESS
```

At the bottom right of the page, it says: "Page generated: Mar 3, 2017 9:24:34 PM UTC [REST API](#) [Jenkins ver. 2.48](#)".
